EXPERIENCE

Data Engineering, BI & ERP/CRM Intern

Food Group Trading

Jul. 2026 – Present Casablanca-Settat, Morocco | On-site

- Reverse-engineered and documented 77 ERP/CRM tables, enabling automated ETL pipelines (n8n) and Power BI dashboards with DAX-based reporting.
- Built and maintained a data warehouse for business-intelligence reporting; modeled ERP/CRM data in Dynamics 365 Business Central using AL.

Software Engineer (Freelance)

2R Parts Auto Accessoires

Oct. 2025 – Nov. 2025 Casablanca-Settat, Morocco | Remote

- Built a desktop management application from scratch: POS, stock, and customer credit management.
- Automated PDF invoicing, financial reporting, and scheduled backups.

Software Engineering Intern

JobGate

Jul. 2025 – Sep. 2025 Ben Guerir, Morocco | Hybrid

- Developed backend features (Django/DRF) for a recruitment platform with an integrated video-interview studio (WebRTC).
- Implemented multi-provider authentication, job/application management, and async task processing (Celery/Redis).

IT Trainer

Private School

Sep. 2023 – Jun. 2024 Casablanca-Settat, Morocco | On-site

- Designed and delivered hands-on IT training programs; supervised workshops and evaluated learners.

Software Engineering Intern

DL Software Maroc

Apr. 2022 – Jul. 2022 Agadir / Rabat-Salé-Kénitra | Hybrid

- Fixed bugs and improved interfaces; developed features in Java and PHP.
- Designed, optimized, and maintained relational databases (MySQL).

PROJECTS

EDUCATION

Engineering Degree, Software Engineering (IIR)

EMSI, Casablanca

2023 – 2027 (expected)

- Information Systems & Networks Engineering
- Databases & data warehousing, BI, application security

Specialized Technician, Full-Stack Development

OFPPT ISTA NTIC2, Casablanca

2020 – 2022

- Front-end, back-end, database design

SKILLS

Technical

Full-Stack Development: React, Next.js, TypeScript, Node.js, NestJS, Django, PostgreSQL

Data Engineering & BI: SQL Server, Power BI (DAX), n8n, ETL/ELT, Python

ERP/CRM Systems: Microsoft Dynamics 365 Business Central (AL)

Desktop Applications: Electron, Python (PyQt5)

Functional

Systems & Requirements

End-to-end information systems, ERP/CRM reverse-engineering, technical documentation

Delivery & Collaboration

Certified Scrum Master, freelance client delivery, agile project management

CERTIFICATIONS

Certified Scrum Master

CertiProf (2024)

Oracle Database

LearnQuest

Python for Web Data

University of Maryland

FidApp — Production Digital Loyalty SaaS

4 deployed applications

- Full-stack SaaS loyalty platform (QR check-ins, no app download). Monorepo: client PWA, merchant dashboard, admin panel, REST API.
- Anti-fraud rotating QR codes, phone-number authentication. *React, Node.js, Express, PostgreSQL, Prisma, JWT, PWA.*

Moqawil / SOAITRAV — Desktop ERP for Construction

Desktop ERP

- Management app for a BTP company (quotes, invoices, delivery notes, clients, stock, dashboard) with A4 PDF generation and digital stamp/signature.
- Auto-updates via GitHub Releases, Windows packaging (electron-builder/NSIS) monorepo (npm workspaces). *React, TypeScript, Electron, Node.js/Express, Prisma, SQLite.*

Opportunities Scanner — Freelance Client Discovery

Personal project

- Automates IT client discovery: centralizes job listings, computes match scores, generates tailored outreach messages with contact tracking.
- Event-driven architecture (REST API, async workers, RabbitMQ, PostgreSQL). *Next.js, NestJS, TypeScript, PostgreSQL, Prisma, RabbitMQ.*

TimeTrack Pro — HR Attendance & Leave Management

Graduation project (PFE)

- B2B SaaS for employee check-in via GPS geofencing and dynamic QR codes, with HR analytics dashboards. *Next.js, React, TypeScript, Firebase/Firestore.*

Management Application — Auto Parts Distributor

Delivered & in production

- Desktop app: POS, stock, supplier and customer credit management, PDF invoicing. *Python, PyQt5, SQLite, SQLAlchemy, ReportLab.*
