

Abderrahmane MEZIANI

Software Engineer — Data Engineering & Business Intelligence

Casablanca, Morocco | +212 6 99 25 42 47 | a.meziani.dev@gmail.com | linkedin.com/in/Abderrahmane-meziani | github.com/AbdMeziani

Profile

5th-year Software Engineering student (EMSI) specializing in **Data Engineering, ERP integration and Business Intelligence**. Currently building end-to-end ETL pipelines and BI reporting solutions using SQL Server, n8n, Power BI/DAX and Microsoft Dynamics 365 Business Central (AL). Combines strong full-stack development skills with a growing data specialization, and a track record of delivering production-ready applications.

Professional Experience

Data Engineering & BI Intern

Food Group Trading | 2025 – Present

- Designed and maintained ETL pipelines in **n8n**, consolidating product data from SQL Server, Excel, HTML scraping and REST APIs into staging tables (`stg_Product`, `stg_API_Product`).
- Built and optimized **SQL Server** queries and data transformations for Merge/Insert workflows, resolving connectivity and column-mapping issues.
- Developed BI dashboards and data models using **Power BI** and **DAX** for business reporting.
- Customized ERP processes on **Microsoft Dynamics 365 Business Central** using the **AL** language.

Software Development Intern – Intelligent Video Studio

JobGate, Ben Guerir | Jul. – Sep. 2025

- Developed a candidate profile module with dynamic video recording and integration.
- Improved application and job-offer management workflows.
- Implemented advanced skill-based filtering for job applicants.

IT Trainer

George O'NEIL, Casablanca | Oct. 2023 – May 2024

- Designed training programs tailored to IT skill development needs.
- Supervised hands-on exercises in small groups, evaluated and corrected work.

Software Development Intern

Rabat, Morocco | Apr. – Jun. 2023

- Fixed bugs and updated interfaces of existing software.
- Developed applications in **Java** and **PHP** following coding best practices.
- Built and maintained relational databases to secure sensitive data.

Key Projects

ETL & Data Warehouse – Food Distribution (SQL Server)

Designed a star-schema data warehouse (DWH.FoodGroup) with dimension/fact tables and T-SQL stored procedures for automated ETL processing.

Hospital Management BI & Data Profiling

Built a reusable Python data profiling tool (`profiling_excel.py`) auto-detecting anomalies in raw Excel sources, with consolidated reporting for a BI portfolio project.

TimeTrack Pro – HR Attendance & Leave Management (Final Year Project)

Full-stack platform with QR-code check-in and GPS/Haversine geofencing, HR/Employee analytics dashboards. *Stack: Next.js, React, TypeScript, Firebase, Firestore, Tailwind CSS.*

ERP Schema Analysis – FMCG/Distribution

Structured analysis and documentation of 77 ERP tables across Sales, Purchasing, Inventory, CRM, Logistics, HR and Finance domains.

Technical Skills

Data Engineering & BI	SQL Server, n8n, ETL/ELT, Power BI, DAX, Power Pivot, Python (Pandas), REST APIs
ERP	Microsoft Dynamics 365 Business Central, AL language
Software Development	JavaScript, React.js, Next.js, .NET 8, Django, FastAPI, Laravel, PHP, Java
Databases	SQL Server, Oracle DB, MySQL, MongoDB, MariaDB, Firestore
Tools & Methods	Git, Scrum, UML, Merise, Firebase, Vercel
Languages	Arabic (Native), French (Fluent), English (Professional working proficiency)

Education

Engineering Degree – Software Engineering	EMSI, Casablanca	Since 2023
Salesforce Development Program	ALX Africa	Aug. 2023 – Nov. 2024
DTS in IT Development	ISTA NTIC2, Casablanca	2021 – 2023

Certifications

Scrum Master (CertiProf, 11/2024) | Soft Skills (ALX, 11/2024) | Oracle & JavaScript (Coursera)
